

BIOBASED BLOCK COPOLYMERS: PBS-co-PLA

AS ADDITIVES FOR BIOMATERIALS

- ✓ 100% BIOBASED
- ✓ BIODEGRADABLE
- ✓ LOW VISCOSITY

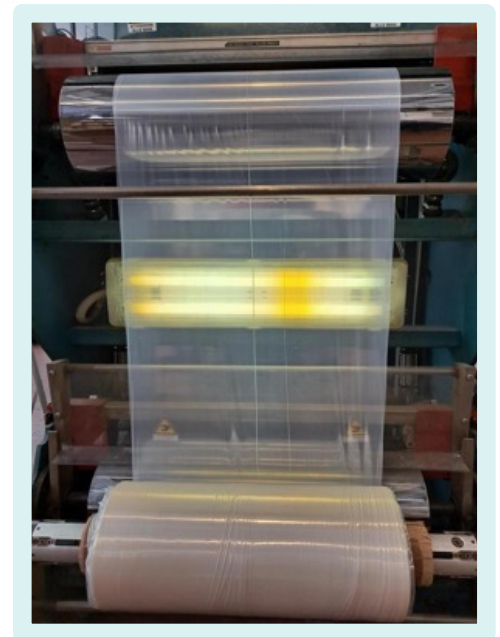

APPLICATIONS

- Plasticizer in bioplastic formulations

BENEFITS FROM THE USE OF PBS-co-PLA IN BIOPLASTIC FORMULATIONS

- **Improved processability:** decreased electrical absorption and pressure during extrusion processes, and compatibility with film converting
- **Improved mechanical properties:** Good deformability and high yield at break
- **Improved optical properties:** high transmittance and clarity for transparent films

CONTACT INFORMATION

BLOCK-COPOLYMER PREPARATION • ITENE

Natalia Ortuño, Project manager in Bionanopolys • M: natalia.ortuno@itene.com • T: +34 672 387 273

BIOMATERIAL PREPARATION • NOVAMONT

Lidia Castano, Project manager in Bionanopolys • M: Lidia.castano@novamont.com • T: +39 0321 699 728

Patrizio Salice, Manager Scouting & Innovation Lab. • M: patrizio.salice@novamont.com • T: +39 0321 699 816
